

Dear Sir/Madam

Re: Elan Gamaker

Elan and I worked together between 2006 and 2010, during which time I was producer of two of his films via my then-company Big World Cinema. Elan wrote and directed the feature film 'Visa/Vie' along with the hour-long 'Dirt' for our most popular television broadcaster.

I remain interested in Elan's career, and as founder producer of Lucky Fish Productions and board member of the Umculo Festival, I am particularly interested in his Dutch output. I believe Elan is a very talented filmmaker and definitely someone to watch.

This includes his current work 'IJspaar', the first fully-improvised Dutch feature film, and also his next project, entitled 'Saturn', which has the potential to be a Dutch/South African co-production.

Please do not hesitate to contact me should you have any further enquiries.

Yours sincerely
